Big Motoring World are a [used BMW dealer in London](#) who have over 500 used BMW in stock. Lookers Car Leasing are due to have my company car back next week so I am going to visit these guys and sort out a cheap used BMW. I am fed up of paying lots of tax every month for the privilege of driving round in a car I don't even actually like. It is a small hatchback with a small 1.6 litre engine that does not have the ability to burn off anybody at the traffic lights. Yes it is economical but it has no boot space, no satellite navigation and no electric windows. They are welcome to have it back and I will look for some cheap used car finance and get myself a BMW 3 series.
